

# Can you afford not to have Home Business Insurance?

## Direct Sales Consultants: ARE YOU PROPERLY INSURED?

Whether you are selling clothing, jewelry, skin care products, Tupperware, nail art or make up, you have invested a lot of time and money into your home based business. Think about the cost of the inventory in your possession right now; is it an amount you can afford to lose?

**Most homeowners policies will not protect you in the following common situations, but a Home Based Business policy would:**

- X Someone steals some of your inventory at a craft fair
- X A fire at your home damages your inventory
- X A customer slips and falls, injuring themselves, at a pop-up party in your home
- X A friend, who was drinking wine at your pop-up party, gets in a car accident on the way home, and you are held liable

**A Home Based Business policy offers important coverages, including, but not limited to:**

- X Coverage for the property you sell while it's at your home (up to \$100,000)
- X Coverage for the property you sell while you are off the premises of your home (up to \$15,000)
- X Liability coverage (up to \$1,000,000)
- X Coverage for loss of income

**The average premium for a Home Business Policy is just \$233!**

To get a personalized quote, call your local insurance agent and ask him or her for a quote through **Concorde General Agency**.
